

BANKING VETERAN PASSES NATIONAL CERTIFICATE IN BANKING

It is never too late to brush up on the latest industry knowledge or acquire new skills, especially in the ever-changing corporate banking sector. Nobody is more aware of this than Joan Gys, a working mother of four children who has worked in the banking sector for over three decades.

Gys is currently employed at First National Bank (FNB) in Bluff. Even though she could be considered an industry veteran with about 35 years of experience under her belt, her strong desire to further educate herself led her to register for a National Certificate in Banking facilitated by Felix Risk Training Consultants (FRTC).

The National Certificate in Banking is an NQF Level 5, 12-month course. The learnership is aimed at new and existing employees in financial services striving to expand their current knowledge of the financial environment. The course focuses mainly on financial product sales, service, financial analysis and credit applications. Having recently passed the learnership, Gys said she would recommend the National Certificate in Banking by FRTC to “anybody seeking a comprehensive, cutting edge, analytical banking programme”.

“I found that the course covered fundamental aspects that will have a major impact in any banking environment,” she said. “While I found it extremely challenging and demanding - the course was custom made to address the critical and pertinent issues that face banking in general, especially within my current work environment.”

Gys thanked Felix Risk Training Consultants for the support and guidance throughout the programme, which she believed was exceptional. “This has been the best Learning experience I have had in my 35 years of banking training,” said Gys.
