## FRTC & BANKSETA — OPENING DOORS OF OPPORTUNITY

*The first intake of learners from Aspire Voice, a UK international Financial Broker, achieved a 100% pass rate in the National Certificate in Core Banking and National Certificate in Sales & Customer Relations, thanks to Felix Risk Training Consultants (FRTC) and BankSeta.*

This growing company, which provides permanent employment to 70 employees, most of whom have no tertiary education as they are the primary providers in their families, sought a solution to employees wishing to further their education and career development.

Aspire's HR Manager Trish Munsami registered the business with BankSeta

in the hope of securing funding for employees to obtain the qualifications they required for their career development that were also aligned with Aspire's business needs, fulfilling expectations all round.

With the excellent training services, one on one sessions, dynamic facilitators and ongoing coaching and support from Felix Risk Training Consultants (FRTC), Aspire was able to achieve the 100% pass rate.

Employees are ecstatic, as their dreams and goals have been realised. They are now able to contribute to the business more efficiently and enjoy the

personal satisfaction of knowing that as individuals they are being developed to grow within the business world. Employees believed FRTC and the BankSeta showed them that a 'closed door is not always a locked door. All that is required is a push for that door to be opened.'

BANKSETA continues empowering previously disadvantaged employees through promoting transformation as guided by the NSDS equity targets of 85 percent Black, 54 percent Female and 4 percent disabled and increasing levels of investment in workplace education and training in KwaZulu-Natal.
